Westermeyer Industries Adds Centrifugal Oil Separator to Family of CO₂ Products

Chicago, Illinois, January 22nd, 2024 –

Today at the 2024 AHR Expo, Westermeyer Industries introduced the "TOS-Series" Centrifugal Oil Separators designed for use with CO₂ refrigeration systems.

Gary Westermeyer, Founder and President of Westermeyer Industries, was instrumental in developing the centrifugal oil separator, a design widely used in the refrigeration industry for decades. These oil separators remove large quantities of oil from refrigerant by forcing it to travel in a centrifugal motion inside the vessel, stripping oil from the refrigerant with these forces. Now, Westermeyer Industries is introducing a first-of-its-kind centrifugal oil separator designed for use in CO₂ systems at transcritical pressures, updating a tried-and-true design for the sustainable future of refrigeration.

"The adoption of CO₂ and other natural refrigerants is becoming more and more important in our industry," says Adam Chapman, Sales Manager for Westermeyer Industries. "Our TOS-series centrifugal oil separators help to meet these needs by providing efficient performance and cost-effective installation and service...our hope is that the addition of centrifugal oil separators in the CO₂ space will make way for further progress and product innovation in CO₂ refrigeration."

Westermeyer Industries is displaying a full line of CO₂ products at the AHR Expo this year, and invite all attending to stop by Booth S6723 to learn more.

About Westermeyer Industries:

Westermeyer Industries designs, manufactures, and distributes high-quality components and accessories for the refrigeration and air-conditioning industries. Products include pressure vessels such as oil separators, receivers, accumulators, oil filters, condensers, and evaporators, as well as level and pressure detection devices and a range of replacement parts. More than a supplier, Westermeyer Industries is dedicated to engineering creativity and design ingenuity, offering catalog products and custom solutions.
