Weidmuller Unveils Space-Saving TERMSERIES-COMPACT Modules

Richmond, Va. (Aug. 21, 2023) - Weidmuller USA, a provider of Smart Industrial Connectivity products and solutions headquartered in Richmond, Va., has unveiled the latest innovation in connectivity for use in all types of industry sectors – the **TERMSERIES-COMPACT**, a versatile all-rounder in terminal-based design.

These cutting-edge relay modules are incredibly compact with a width of only 6.4mm and a low height, making them a perfect fit for any low cabinet box. Another game-changing feature is the ability to customize them for space-saving needs in applications that require a normally open contact version or a fused relay output version. With TERMSERIES-COMPACT, there's no longer a need for extra terminal blocks with fuses.

Ultra-compact with a slim, flat design, these relays can be installed anywhere, even in environments with strong vibrations. Since they have the same contours as the tried-and-tested TERMSERIES family, all the accessories of the series can be used for applications such as cross-connections.

"TERMSERIES-COMPACT modules save on components, simplify wiring, and significantly cut down assembly time," said Carlus Hicks, Director-Cabinet Products Division. "Our patented PUSH-IN connection technology and colored pushers make wiring 75% faster and considerably safer."

Hicks also noted that TERMSERIES-COMPACT modules come in different versions and a variety of input voltages wit 24-230 V UC and 12-80 V UC available for the first time in an extremely compact design. "As a highly flexible connectivity module that's compatible with the complete TERMSERIES family, TERMSERIES-COMPACT is destined to become the preferred solution for interfacing loads, sensors or signals to different PLC and DCS systems for our industry partners," he added.

Learn more about Weidmuller's new line of TERMSERIES-COMPACT modules.

About Weidmüller Group

Founded in 1850 and operating in Richmond, VA, for almost 50 years, the Weidmüller Group has production sites, sales companies, and representatives in more than 80 countries. Together with its customers, the Germany-based, family-owned company is shaping digital transformation with products, solutions, and services for smart industrial connectivity and the Industrial Internet of Things. In fiscal year 2022, Weidmüller generated a turnover of more than one billion euros with about 6,000 employees around the world. Weidmuller USA has been awarded a Top Workplaces honor by Richmond Times-Dispatch for two years in a row (2022-2023). In May 2023, Weidmuller USA broke ground on a new engineering and manufacturing facility in Richmond that is designed to develop and deliver electrical connectivity and automation solutions closer to U.S. customers.
