**(Washington, D.C. December 12, 2017)** – The [AABC Commissioning Group](#) (ACG) is a non-profit association dedicated to the advancement of independent third-party building commissioning comprising the world's largest group of certified commissioning authorities (CxAs). Earlier this year, the CxA program achieved accreditation by ANSI enabling it to be recognized by the Department of Energy's Better Buildings® Workforce Guidelines program, ensuring that the CxA is considered an approved commissioning credential for all federally funded projects. ACG is exhibiting in booth 2824.

ACG is conducting a newly expanded, two-day workshop and exam for its [Commissioning Authority \(CxA\) Certification](#) on January 23-24, 2018 in conjunction with the AHR Expo. This workshop covers all aspects of commissioning ranging from project management to functional testing and entails many group breakout activities to develop and discuss samples of key commissioning deliverables. The CxA exam is a 4-hour, closed-book exam that tests candidates on their knowledge of the commissioning process, as well as a general understanding of building systems and how commissioning fits in with the rest of the construction process. [Registration](#)

ACG's fifth annual [CxEnergy Conference & Expo](#) provides more topical, in-depth educational presentations than ever for commissioning, TAB, and energy management professionals. CxEnergy 2018 is being held April 23-26 at the Rio All-Suite at Las Vegas, NV.

Attendees will earn AIA and other industry certification continuing education credits for presentations that include case studies and topics in building envelope/enclosure commissioning, technology & innovation, energy management, commissioning specialty systems, policy & financial issues, lighting, water management, data centers, microgrids, energy storage and more. The speakers represent companies and organizations including ASHRAE, National Institute of Building Sciences, Lawrence National Berkeley Laboratory, Citi, Stanford University, Caesars Entertainment, United Technologies Corporation, Hanson Professional Services, Jensen Hughes, Lutron, Schneider Electric, TLC Engineering for Architecture and more. See CxEnergy 2018 [Preliminary Technical Program](#) here.

The [expo hall](#) showcases a wide variety of products including controls, software, instruments, metering devices and services targeted specifically to commissioning, energy management, engineering and testing firms. Event information and the latest updates and online registration are available at [www.CxEnergy.com](http://www.CxEnergy.com)
