WAGO Develops New Flexible BACnet Coupler

Germantown, WI—December, 2017—The new 750-330 BACnet coupler is the latest addition to the line of building automation controllers and remote I/O. The Building Automation and Control Network enabled coupler facilitates the communication between building automation devices and control systems applications. The BACnet/IP Coupler is equipped according to BACnet revision 12, can also manage up to 256 BACnet objects. It also supports BACnet functions for scheduling of data points, trending and alarming.

“The new coupler from WAGO provides a lot of value for any Ethernet based BACnet controller system that needs to collect or control decentralized sensors or actuators via native BACnet objects,” Charlie Norz, Product manager of the WAGO-I/O-SYSTEM explains. “The 750-330 coupler is very simple to configure using WAGO’s free BACnet configuration software, reducing engineering and commissioning hours.”

Using the WAGO BACnet configurator software, set up and commissioning is easy—no programming required. This economical device further reduces costs due to its flexibility to add additional I/O instead of purchasing another brick I/O device. An onboard SD card slot allows users to easily backup/restore or duplicate device settings, or it can be used to store trend data. Use it in applications like heating, ventilating, air conditioning, lighting, access control and fire detection systems. For more on the latest from WAGO, visit www.wago.us/news.

Innovation is at the heart of everything we do at WAGO. From our pioneering CAGE CLAMP® spring pressure connection technology to our extensive range of Interconnect, Interface and Automation solutions, such as the fieldbus independent WAGO-I/O-SYSTEM, our customers count on the unconditional performance and reliability of our products to ensure the safe, efficient operation of their systems every time.

For additional information, visit www.wago.us. Contact WAGO at 1-800-DIN-RAIL, info.us@wago.com or contact Charlie Norz, Product Manager--WAGO-I/O-SYSTEM at press.us@wago.com. Be sure to visit us at Booth # 4313 at the AHR Expo in Chicago from January 22nd to the 24th to see the BACnet couplers among a myriad of other HVACR solutions.
