RHEEM'S GLOBAL FAMILY OF BRANDS GATHER AT AHR EXPO 2018

New Energy Efficient HVAC, Water Heating, Boilers, and Refrigeration Products from Rheem, Ruud, Raypak, Eemax and HTPG Can be Seen in One Location at AHR

ATLANTA, January 22, 2018 – The Rheem® family of brands will be exhibiting together at AHR Expo 2018, presenting one of the most comprehensive lines of heating, cooling, water heating, refrigeration, and pool/spa products in the industry. Joining Rheem® and Ruud® in booth #4955 will be Raypak®, Eemax® and the Heat Transfer Products Group (HTPG).

Rheem has made an enterprise-wide investment in its commercial platforms this year, focusing on market demand for high efficiency products that are easy to install and service, feature smart technology that saves on operational costs, and offer flexible configurations for the widest variety of applications. One highlight of that commitment is the launch of Rheem *Triton*™ at AHR, the most intelligent commercial water heater on the market.

“We are the only manufacturer to offer a full suite of HVAC, water heating, pool and spa and refrigeration equipment, so we are in a unique position to serve commercial markets,” said John Fitzgerald, executive vice president, operations, Rheem. “For the first time at AHR, we’ll be able to show the complementary relationship between our business units while highlighting the next generation of game-changers for the market.”

Products to be showcased at AHR Expo, include:

- Rheem’s new commercial HVAC platform, [Renaissance™](#) is equipped with innovative technologies to exceed the new Department of Energy’s IEER requirements. *Renaissance* rooftop units deliver a footprint and connection configuration that simplifies the replacement process.
- Rheem’s [Ultra Low NOx Residential Gas Furnace](#) is the first to be certified by SCAQMD for Rule 1111. The unit will decrease NOx emissions by 65 per cent from the current standard.
- The all-new [Rheem® Triton™](#) is the most intelligent commercial water heater on the market. With an all-inclusive leak detection and prevention system, *Triton* detects and communicates failures to prevent catastrophic damages.

-More-

- **Rheem® Commercial Condensing Tankless Water Heaters** are ideal for applications up to 185°F that require continuous hot water. The out-of-the-box units are up to 96% thermal efficient.
- The next generation in electric tankless water heaters, **Eemax® AccuMix II™** units feature an integrated ASSE 1070 rated mixing valve for code compliant handwashing.
- **Eemax LavAdvantage™** is a modern line of industry leading thermostatic electric tankless units, heating water at its point-of-use with a 0.2 GPM turn on flow.
- **The Eemax AutoBooster™** is a water heater tank booster that is easy to install and increases deliverable hot water up to 45%.
- New high performance electric tankless water heaters, **Eemax SafeAdvantage™** units employ Parabolic Heat Design (PhD) technology to deliver tepid water for safety applications.
- **Raypak® XVers® Commercial Condensing Boilers** are equipped with the Versa IC integrated control system and can operate a single boiler or cascade of boilers without requiring an external sequencer.
- The new **Raypak® Professional XTherm® indirect pool heating systems** are factory assembled and plumbed on a prefabricated skid using ultra-high-efficient XTherm boilers. Easy to install and commission, the units come with a touchscreen display and Raypak's Versa IC® control system.
- **Russell® Next-Gen All-Temp™ Unit Coolers** are ideal for small to medium walk-in coolers and freezers and feature high efficiency motors, a new fan guard design, deep draw venturi, and a redesigned housing.
- Russell's award-winning **Next-Gen MiniCon™ Air Cooled Condensing Units** have been engineered to increase flexibility and improve efficiency for lower long-term operating costs. All models have base mounted shut-off valves, a removable control panel door, and point-to-point wiring.
- The **HTPG® QV-Series Condensing Units™** set a new standard for efficiency, reliability and serviceability. Models incorporate features from the award-winning Quantum Air™ Condensers such as a floating coil design, swept wing fans blades, LED lighted control panel, and hinged venturi panels.
