

## **Victaulic to Reveal Latest Project Lifecycle Solutions & PHA Innovations at 2018 AHR Expo**

CHICAGO: 2018 AHR Expo (Booth 2937, North Building), Jan. 22-24 -- Victaulic has selected the 2018 International Air-Conditioning, Heating, Refrigerating Exposition (AHR Expo) to reveal its latest PHA project lifecycle solutions and product innovations, including a sneak peek at its new line for small diameter carbon steel pipe.

Visitors to Booth 2937 will experience a Victaulic-optimized mechanical room both in-person and via 3D virtual reality technology. They can also view the newest additions to Victaulic's complete PHA system solutions, including:

- The industry's first grooved pipe joining solution for CPVC/PVC pipe that's quickly revolutionizing how engineers and contractors join plastic pipe in both HVAC and potable water systems;
- An expanded product line for grooved saturated steam and condensate piping – the Series 871 Gate Valve, the Series 159 Flexible Loop, and the RG1200 In-Place Roll Grooving tool – that eliminates the need to weld this type of piping up to 200 psi and 388°F;
- The latest advancements in equipment modules – vibration isolation pump drops, pressure reducing valve stations, and air handling unit drops – that offer noise and vibration attenuation and reduce risk and labor costs;
- And, the company's newest solution, a plain end Installation-Ready™ system for small diameter carbon steel pipe, that will launch in early 2018.

“In an ever-changing industry, Victaulic has become a steadfast partner, trusted by owners, engineers and contractors to provide efficient and durable solutions throughout the project lifecycle, from design through construction,” said Rick Bucher, Victaulic's Executive Vice President of Technology and Product Development. “This collection of products is a testament to Victaulic's never-ending commitment to collaborate with its customers to bring cutting-edge solutions to market that meet their evolving needs and surpass their expectations.”

Those interested in learning more about Victaulic or speaking with one of the company's industry experts can connect with the team at the 2018 AHR Expo by:

- Visiting Booth 2937 in the North Building from Monday, Jan. 22 through Wednesday, Jan. 24.
- Attending Victaulic's “First Grooved Solution for CPVC Pipe” presentation on Monday, Jan. 22, at 1:15 p.m. in Theater B.
- Joining the in-booth press briefing on Tuesday, Jan. 23, at 3:00 p.m. to hear more about Victaulic's latest innovative system solutions.

### **About Victaulic**

Since 1919, Victaulic's solutions and drawing services have increased construction productivity and reduced risk, ensuring projects are completed safely, on time and within budget. Driven by a spirit of continuous innovation, Victaulic's portfolio of 100,000+ products and patented technologies promote

freedom of design, safe and efficient jobsites, as well as simplified inspection and maintenance for the life of any system.

As an industry leader in Virtual Design, BIM content and software solutions, and a recognized Autodesk partner, Victaulic offers project coordination, estimation, and project management, along with BIM drawing services and hands-on training for commercial, industrial and pipeline construction business professionals. Victaulic drives industry growth by enhancing routing efficiencies and delivering cost certainty throughout the project life cycle.

With more than 3,500 employees and 40 international facilities, Victaulic helps customers in over 120 countries succeed in the global construction industry. Our solutions can be found within diverse markets, from the tallest, most complex buildings to the most rugged and deep mines across the globe. Learn more about how our innovative piping products and design services can engineer confidence into your build at [www.victaulic.com](http://www.victaulic.com).
