Victaulic Celebrates 100 Years of Innovation at 2019 AHR Expo

Atlanta, the site of this year's AHR Expo, is also home to two newly built mega sports stadiums that prominently feature Victaulic system solutions

ATLANTA: 2019 AHR Expo (Booth B3453), Jan. 14-16 – [Victaulic®](#) will kick off its centennial milestone celebration in Atlanta at the 2019 International Air-Conditioning, Heating, Refrigerating Exposition (AHR Expo) by showcasing its HVAC system solutions that symbolize the company's 100-year commitment to technology and innovation.

Visitors to Booth B3453 will experience a Victaulic-optimized mechanical room in person, demo a new interactive pipe routing simulation and view the newest Victaulic solutions, including:

- The QuickVic™ SD Installation-Ready™ System, the most efficient and economical way to join small diameter carbon steel pipe;
- The industry's first grooved pipe joining solution for CPVC/PVC pipe that's quickly revolutionizing how engineers and contractors join plastic pipe in both HVAC and potable water systems;
- And the latest advancements in equipment modules – vibration isolation pump drops, pressure reducing valve stations, and air handling unit drops – that offer noise and vibration attenuation and reduce risk and labor costs.

“With AHR in Atlanta, it's a fitting location to start commemorating our 100-year anniversary of innovation since Victaulic's engineering services and pipe joining solutions are prominently featured in the city's newest sports complexes, MLB's SunTrust Park and the NFL's and MLS' Mercedes-Benz Stadium, which will host Super Bowl LIII,” said Rick Bucher, Victaulic's Executive Vice President of Technology and Product Development. “In the last century, Victaulic has solved the toughest challenges for customers, set new standards for the industry and saw more than one billion Victaulic products installed globally. The products we're showcasing at AHR exemplify our dedication to create full lifecycle solutions for our customers and work alongside them to develop products that are a step ahead of the industry.”

Those interested in learning more about Victaulic and its history of innovation or speaking with one of the company's experts can connect with the team at the 2019 AHR Expo by:

- Visiting Booth B3453 in the North Building from Monday, Jan. 14 through Wednesday, Jan. 16.
- Attending Victaulic's “QuickVic™ SD: Most Efficient & Economical Way to Join Small Diameter Carbon Steel Pipe” presentation on Monday, Jan. 14, at 1:45 p.m. in Theater B – Room C102.

- Joining the in-booth press briefing on Tuesday, Jan. 15, at 3:30 p.m. to hear more about Victaulic's 100-year anniversary and its latest innovative system solutions.

About Victaulic

Since 1919, Victaulic's solutions and drawing services have increased construction productivity and reduced risk, ensuring projects are completed safely, on time and within budget. Driven by a spirit of continuous innovation, Victaulic's portfolio of 100,000+ products and patented technologies promote freedom of design, safe and efficient jobsites, as well as simplified inspection and maintenance for the life of any system.

As an industry leader in Virtual Design, BIM content and software solutions, and a recognized Autodesk partner, Victaulic offers project coordination, estimation, and project management, along with BIM drawing services and hands-on training for commercial, industrial and pipeline construction business professionals. Victaulic drives industry growth by enhancing routing efficiencies and delivering cost certainty throughout the project life cycle.

With more than 3,500 employees and 40 international facilities, Victaulic helps customers in over 120 countries succeed in the global construction industry. Our solutions can be found within diverse markets, from the tallest, most complex buildings to the most rugged and deep mines across the globe. Learn more about how our innovative piping products and design services can engineer confidence into your build at www.victaulic.com.
