FOR IMMEDIATE RELEASE:

SWEP North America rolls out new expedited lead time program

Landskrona, Sweden, September 2019 – As part of our ongoing efforts to better serve our customers, SWEP North America, Inc. is pleased to announce that we are rolling out a new expedited lead time program for our brazed plate heat exchangers (BPHEs).

This new lead time initiative applies to orders that are manufactured at our Tulsa facility only with a standard 3-week lead time. This can give customers a chance to receive their product as early as one week or less from the date that the order is placed with a local SWEP customer support contact. SWEP hopes that this program will give our customers some flexibility with critical situations and will, in turn, help them to secure more orders. There will be an initial trial period for this program while we iron out the wrinkles, and we will keep you informed of any changes we need to make going forward to ensure that this new program is running smoothly for both SWEP and their customers.

Please contact your local SWEP North America sales or customer support contact to learn more about this new solution.

Please visit SWEP at Booth # 5743 during the AHR Orlando Expo being held Feb. 3rd-5th at the Orange County Convention Center to check out our full range of brazed plate heat exchangers (BPHEs) for HVAC, Refrigeration, Industrial, and District Energy applications.
PRESS RELEASE

SWEP is a world-leading supplier of brazed plate heat exchangers for HVAC and industrial applications. Designed to make the most efficient use of energy, material, and space, the technology is quickly winning ground around the world, with SWEP at the forefront of developments.

About SWEP – Challenge efficiency
At SWEP, we believe our future rests on giving more energy than we take – from our planet and our people. That’s why we pour our energy into leading the conversion to sustainable energy usage in heat transfer. Over three decades, the SWEP brand has become synonymous with challenging efficiency.

SWEP is a world-leading supplier of brazed plate heat exchangers for HVAC and industrial applications. With over 1,000 dedicated employees, carefully selected business partners, global presence with production, sales and heartfelt service, we bring a level of expertise and customer intimacy that’s redefining competitive edge for a more sustainable future. SWEP is part of Dover Corporation, a multi-billion-dollar, diversified manufacturer of a wide range of proprietary products and components for industrial and commercial use.
